SECTION 3 – COMPOSITION AND INFORMATION ON INGREDIENTS

Description (Raw Material Name)	CAS Number	OSHA PEL	ACGIH TLV (TWA)	OTHER LIMITS RECOMMENDED
N/A	-	-	-	-

The TWA exposure value is the average airborne concentration of a particular substance when calculated over a normal 8 hour working day for a 5 day working week. The STEL (Short Term Exposure Limit) is an exposure value that may be equaled (but should not be exceeded) for no longer than 15 minutes and should not be repeated more than 4 times per day. There should be at least 60 minutes between successive exposures at the STEL. The term "peak" is used when the TWA limit, because of the rapid action of the substance, should never be exceeded, even briefly.
